

NF-1 refers to

NEUROFIBROMATOSIS  
TYPE-1

Dakshama Health & Education  
Your Voices Your Choices

1 in 3000 births have NF

That's 2,000,000  
worldwide!!

NF1 affects all  
populations, genders &  
ethnicities equally

Visible Signs to Look For:

Café-au-lait spots: Light brown patches on the skin.

Freckling: In armpits or groin area.

Neurofibromas: Small, soft tumors on or under the skin.

Lisch nodules: Tiny bumps on the iris (eye).

Scoliosis: Curved spine or bone deformities.

MAY is  
Neurofibromatosis  
Awareness Month

**Challenges NF1 Patients Face:**

- Learning Disabilities 📖
- Chronic Pain 🗡️
- Tumor Growth 🧬
- Limited Treatment Options 🏥
